

COOLING

AIR BLAST RADIATORS

Bespoke Radiators, designed to meet customer specific requirements with regard to variations on heatload per section, number of sections, flow rates, ambient temperatures, etc.

CERTIFICATION

All units are validated with industry leading design programmes to ensure the bespoke package meets the application requirements.

FEATURES & BENEFITS

- ✓ Cooling packages designed to customer specific requirements
- ✓ Variety of manufacturing materials available and selected to match the application including solder dipped, copper and brass cores with fully galvanised fabrications for extended service life in even the most arduous of conditions - on or offshore
- ✓ Engine driven, electric or hydraulic fan drive options
- ✓ Suitable for the ATEX Zone 2 requirements for use in potentially explosive atmospheres. Engine mounted or remote cooling packages - as required by the application

GLOBAL SUPPORT

Broadland Radiators are in operation around the world, and are fully supported by a network of strategic partners

PRODUCT SUPPORT

We work with our customers to ensure they get the product they require and often incorporate customer specific requirements in our designs.

ABOUT BROADLAND RADIATORS

Broadland Radiators design, build, manufacture and repair a wide range of cooling systems, radiators and heat exchangers. We have over 50 years' experience in developing bespoke cooling solutions designed to work with your equipment and application.

QUALITY

We ensure quality at every step in the process.

All units receive 100% final product inspection and test at our ISO9001:2008 certified production facility.
